

## PROPOSED DRAFT February 2015

### 409.03.10 Sweeping and Brooming

Provide a roadway free of loose cover material. In curb and gutter sections, remove and dispose of all loose cover material from the roadway and sidewalks. Do not allow material to enter any storm drain system or aquatic resource. In guardrail sections, do not allow loose cover material to accumulate beneath the rail.

Deleted: and guardrail

Deleted: get into

Deleted: the

Deleted: any

### COMMENTS

1. 409.03.10 Sweeping and Brooming: This change is meant to ensure that loose material is not allowed to accumulate under guardrails. MDT said did not want loose chips or winter traction material to begin to accumulate under guard rails. MDT maintenance personnel stated they would make every effort to get that existing accumulation removed prior to project bidding. MCA appreciates that effort by maintenance personnel.

Response: Agreed
